Fourteenth Season

THE LODGE, SKYLANDS FARM
SLOATSBURG, N. Y.

NEW INTRODUCTION

MIDDAY (Peckham 1941) The general effect is that of a bright yellow and peach blend of soft but luminous colors which are especially good at midday. It is extremely floriferous, has ten or twelve buds on each stalk, and is a robust grower. 36 inches \$7.50

PREVIOUS INTRODUCTIONS

ALACRITY (Peckham 1940) A charming tall pale yellow and pink blend, very floriferous, long blooming season, and graceful habit. Fine garden variety. Fragrant. \$5.00

MANZANILLA (Peckham 1940) Clear neutral red overlaid vandyke red. Large waved flowers of good substance on well-branched, strong 34 inch stems. Cadmium orange beard. Fragrant \$7.50

TOPHET (Peckham 1939) Striking tall variegata of brilliant carrying quality and garden effect. Clean honey yellow and velvety claret brown. Very weather resistant; a rapid increaser. \$3.50

KOROLKOWI HYBRIDS

Lovely for the rock-garden or front of the border. Rare. One dollar each.

Baby Blue

Fallen Leaf

Salerosa

TERMS

Prices are based on first quality stock, vigorous single rhizomes, free from disease and true to name.

Terms are net, cash with order, except for discount of ten per cent on orders of more than thirty dollars and discount of five per cent on orders of more than ten dollars from A. I. S. members.

Dealers should write for wholesale rates or for quotations on varieties not listed.

We can not undertake responsibility for growth or flowering results. All stock is in good condition when shipped, and with proper care it should thrive under normal conditions.

No substitutions will be made unless ordered.

ORDER EARLY to avoid disappointment. Available stocks of some of the newer varieties are naturally somewhat limited.

Shipping is done from the first of July to the first of September preferably, also at other dates if ordered.

Please include twenty-five cents on orders of less than two dollars to cover packing and postage.

CULTURAL DIRECTIONS

Irises should be placed to get a maximum of sunlight in ordinary sweet garden soil. When planting, spread roots and place rhizomes just under the surface. If ground is dry, water well to settle the soil about the roots. Late autumn planted stock needs some protection.
